PlayCore Southern Fulfillment Center Achieves PCI 4000 Certification

The PlayCore Southern Fulfillment Center in Ft. Payne recently achieved the Powder Coating Institute's PCI 4000 certification . This certification is awarded to powder coaters that pass a rigorous audit where adherence to the highest quality standards and powder coating application best practices are demonstrated. The PCI 4000 Certification Program uniquely recognizes powder coaters who have the competency and processes in place to produce quality powder coated products.

The following eleven areas were evaluated. Each critical performance area required a passing grade in order to achieve certification.

- Surface Preparation
- Ovens and Curing
- Application Area
- Incoming Quality Control
- Training
- Maintenance
- Customer Satisfaction
- Process Control
- Quoting and Warranty Policies
- Final Quality Control
- Loading, Unloading and Packaging

In the audit process, the powder paint team demonstrated an understanding that powder coating is a high-performance painting process and must be maintained and controlled to optimize the performance of the finish. This certification also reflects the fact that the Southern Fulfillment Center has the capability, processes and competency in place to supply a high-quality powder coated product.

Creating Memories Across Generations

At GameTime, we cherish our childhood memories of exploring new playgrounds, nervously zipping down slides that once felt sky-high, only to appear much smaller as we grew older. Our playgrounds invite the whole family to join in the fun, creating new memories together that will last a lifetime.

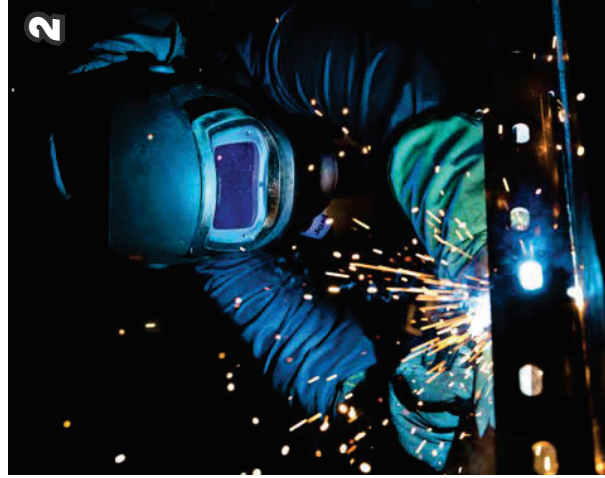

Research shows that spaces designed for intergenerational use see high rates of return visits. These cross-generational interactions are valuable for all ages, as each generation can learn from the other, fostering deeper connections and a greater understanding of the world around them.

About the Cover
Aurora is a new and exciting way for everyone to play together. Learn more on page 87.

GameTime reserves the right to change the configuration, style, or price of any product based on availability and other conditions. Please refer to gametime.com or contact your local GameTime representative at 800.235.2440 for the latest information on our products.

Trusted Partners

1 Local Service

GameTime's network of local sales, service, and installation pros make it fast and easy to design and install your new playground. With experts in 26 countries and on six continents, wherever you are, we're local.

2 World-Class Design and Manufacturing

We proudly design and build our products in the USA in our 400,000 sq ft facility in Fort Payne, Alabama and custom design studio in San Marcos, Texas. Our skilled artisans utilize the latest manufacturing technology to ensure your products are made right and last for decades.

3 Best Practice Research

We leverage the best practice research from our parent company, PlayCore, to inform our designs and to support community recreation outreach and advocacy. Learn more on page 256.

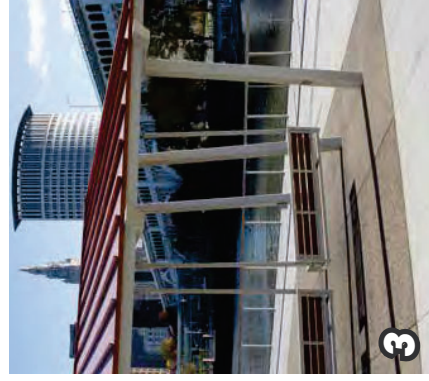

Community Champions

Unique Play
Experiences

Different by Design

1 National Demonstration Sites

We believe high-quality recreation environments play a critical role in promoting community health. Research indicates that when stakeholders are engaged in the planning process, with evidence-based design principles positive outcomes occur. When you design a playground at one of the five best practice programs, your project is eligible for recognition by PlayGone as a National Demonstration Site. Play your site at gametime.com/dms

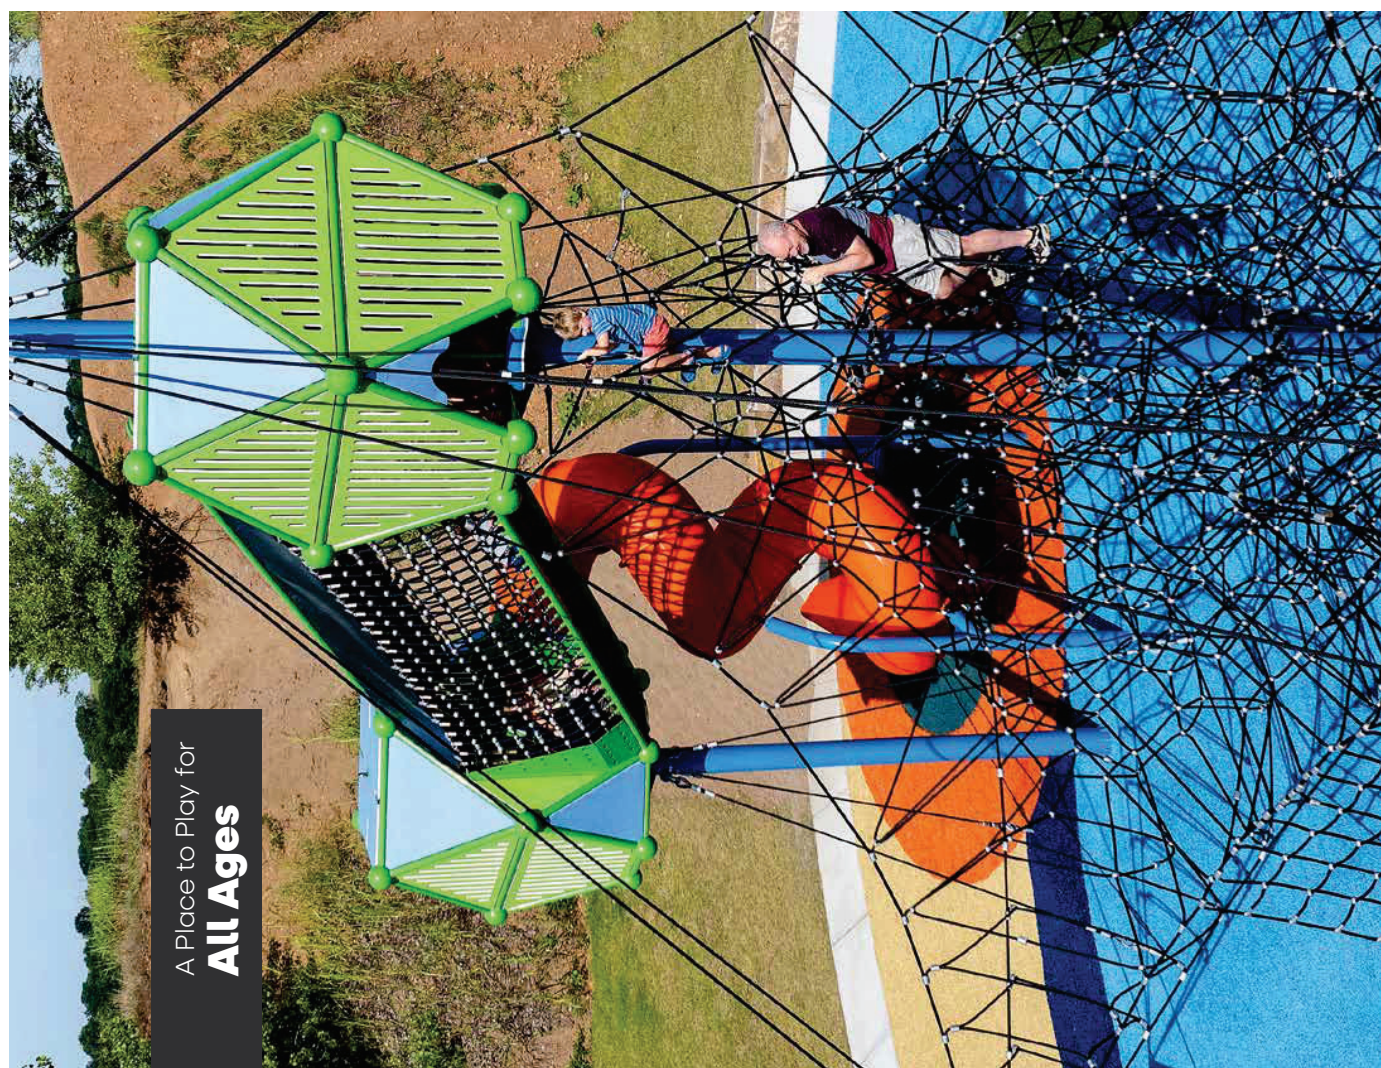

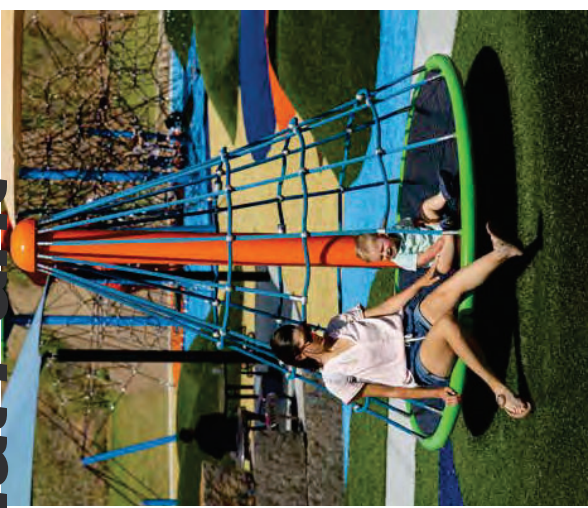

2 Landmark Design

Landmark Design is the custom play team at GameTime. Our designers, engineers, and artists create fun and imaginative places for children to play and explore. Whether you want to connect a playground to your community's unique past or inspire the next generation to boldly explore the future, we can help. The only limit is your imagination. Be inspired at gametime.com/landmark

3 Shelters

New from GameTime in 2025! Check out our line of shelters that are perfect for creating spaces for people to gather, rest, and socialize. Learn more at gametime.com/shelters

Washington Irving Memorial Park

A Place to Play for
All Ages

Washington Irving Memorial Park

BIXBY, OK

Nestled alongside the Arkansas River, this public park and arboretum is named after the celebrated American writer Washington Irving who camped in the area during his 1832 exploration of the western United States. Inspired by his adventurous spirit, this new playground invites visitors to embark on their own journeys.

Parkgoers will be instantly captivated by the towering custom net climbers - so tall that children at the top will feel as if the adults below have shrunk! These impressive, multi-sided structures utilize durable WeaveTech® cables, woven together at different angles, to offer a dynamic play experience with many ways to explore.

Adding to the excitement are the hillside slides, which are installed along the slope of the natural landscape. Kids can imagine themselves as fearless mountain climbers, gripping the attached climbing rope as they embark on their daring journey, ending their adventure with a fun ride down the slide.

National Demonstration Site for
Inclusive Play

Loris Nature Park

Loris Nature Park

LORIS, SC

When the city of Loris, South Carolina discovered GameTime's evidence-based approach to playground design, they knew they'd found the perfect partner to bring their vision to life.

Inclusivity was at the heart of the playground's design concept. The entire structure has ramped access and features wide decks, allowing children who use mobility devices to explore the unit comfortably.

The playground's natural palette of browns, beiges, and greens complements the surrounding greenery, inviting children and caregivers to join in the fun. As they follow animal prints and hop over "rivers" in the surfacing, parkgoers can explore a variety of freestanding activities, from the Inclusive Whirl to a giant, climbable ladybug. The adventure continues at the main play structure, where a mix of climbers, sensory experiences, and slides awaits.

Lytle Park

Welcome to the
New Gym

Lytle Park

CINCINNATI, OH

Lytle Park, a multi-acre historic park in the heart of Cincinnati's central business district, is setting the standard for adult fitness with their new outdoor workout space.

At the center of the fitness area is the THRIVE 900 – a versatile system where up to 20 people can enjoy a full-body workout in just 900 square feet. Featuring a range of functional training stations, such as three types of overhead trainers with various grip options, the THRIVE 900 is designed to help users of all fitness levels achieve their wellness goals.

Surrounding the THRIVE® unit are popular freestanding pieces from our Challenge Course line, including the Agility Pods, Travel Wall, and Corridor. These engaging pieces come together to create a dynamic, full-body fitness experience that encourages everyone to get active.

By introducing fitness stations to community parks, the city of Cincinnati is giving their teens and adults an enjoyable, no-cost way to stay active and healthy while enjoying the great outdoors.

Atascocita Springs Elementary School

Play That Celebrates
Imagination

Atascocita Springs Elementary School

HUMBLE, TX

This elementary school's dino-mite playground is far from prehistoric – it's a shining example of modern custom design capabilities.

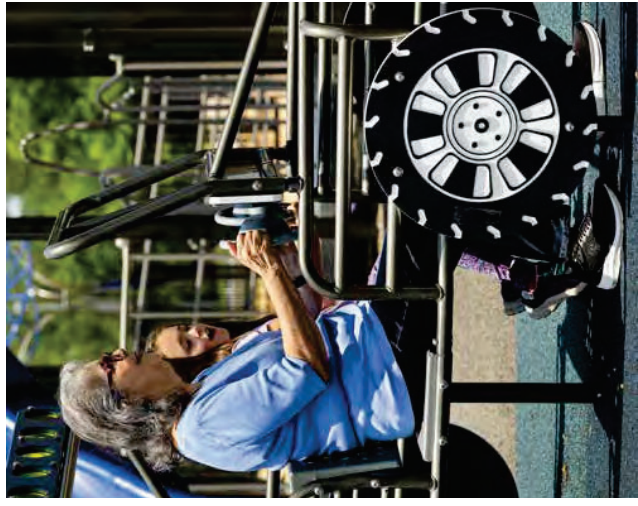

From the moment kids step onto the playground, they're transported into a Jurassic adventure. Dinosaur footprints, lava, and even a massive fossil are embedded beneath their feet using poured-in-place rubber surfacing.

As aspiring paleontologists roam the space, they will encounter familiar dino friends, such as the T-Rex and Triceratops. These friendly faces lead the way to the larger play structure, adorned with our recycled Timbers panels and tree toppers. Brave adventurers can crawl through the net tunnel, arriving at the heart of a volcano where a fast tube slide awaits - creating a perfect escape route from the "active" eruption!

Kid's Kingdom

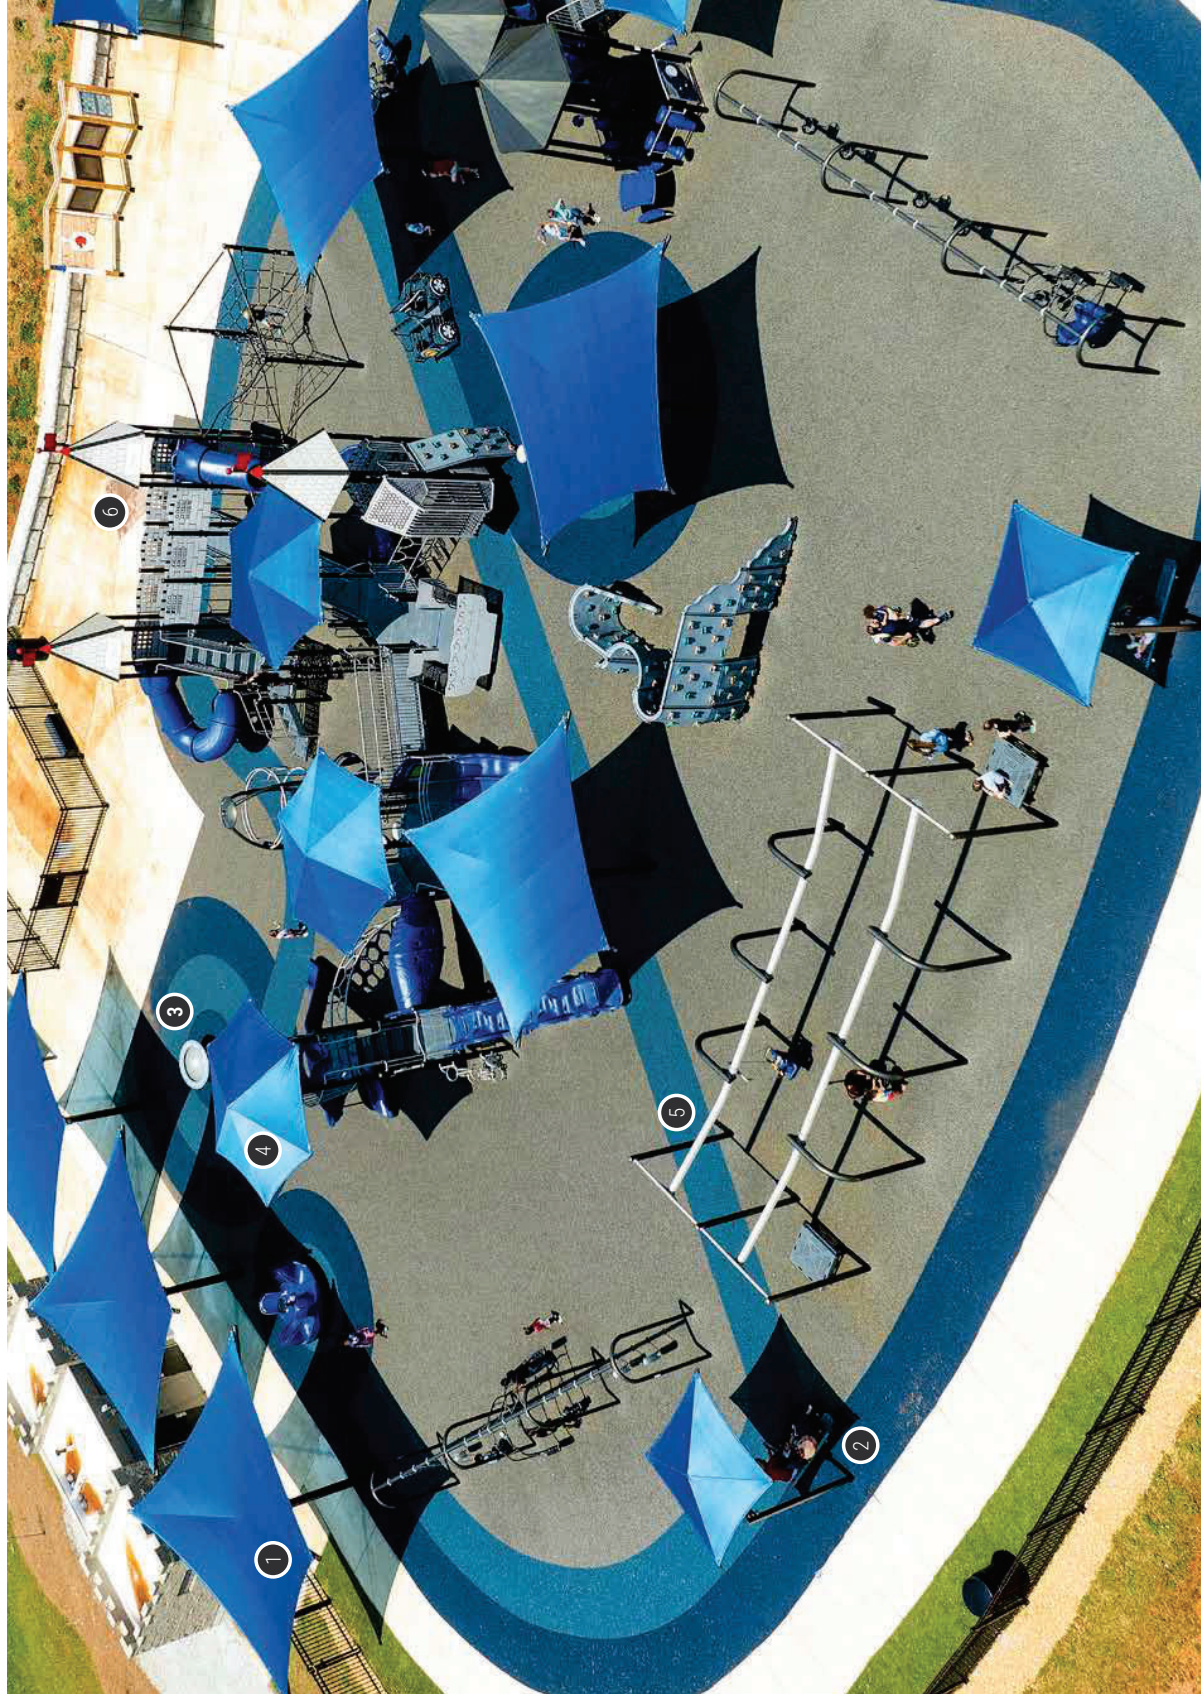

Embark on New
Adventures

Kid's Kingdom MADISON, AL

When their aging wooden play structure needed replacement, the city of Madison, Alabama, set out to build an inclusive playground that honors the cherished memories created on the original playground while incorporating modern, accessible features for future generations to enjoy.

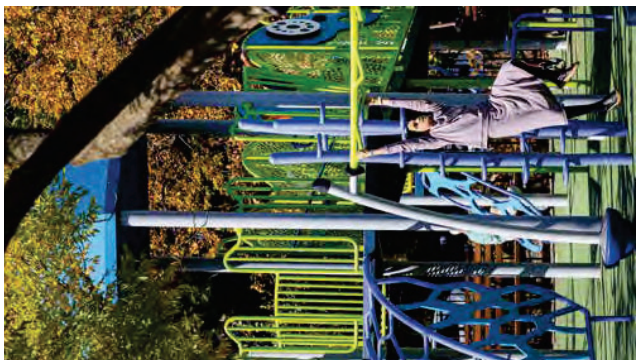

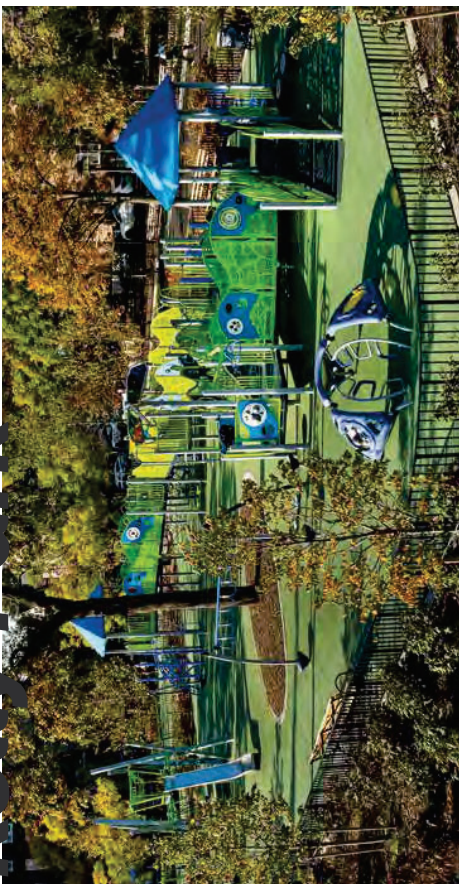

At Kid's Kingdom, children of all ages and abilities can let their imaginations soar! One moment, they might be rescuing a friend in a medieval castle; the next, they're launching into a space-themed adventure.

Kid's Kingdom stands as a testament to the importance of play in every child's life, regardless of ability. With wide, ramped decks and transfer-level motion activities, every child is empowered to be themselves as they embark on new adventures with friends.

Kelly Park

Big City
Bigger Play

Kelly Park BROOKLYN, NY

Kelly Park champions play for all with a new, inclusive playground where children of all abilities can make memories together.

This inclusive destination features three ramp-accessible systems, each with unique climbers, slides, and sensory experiences that empower every child to play their way. With accessible surfacing installed throughout the space, every corner of the park is open for exploration.

Urban environments often lack outdoor spaces that encourage children to socialize and engage in physical activity. Kelly Park offers a space where kids can release energy, stay active, and connect with others in their community.

Play is Where
We Belong

1 Play for All

Our ramps and transfer platforms enable people using mobility devices to comfortably join their peers on the main deck of the system. We also developed SureStep, a semi-flexible material applied to various climbers, links, and attachments, to provide extra traction and help children of all abilities climb.

2 Sensory Play

Sensory play is a fantastic way to engage every child on the playground! We've designed musical panels for auditory stimulation, colorful Shadow Play® panels for visual sensory play, and our Sensory Wave Climber® to promote active play while engaging the different senses.

3 Research-Based

Our parent company, PlayCore, developed the 7 Principles of Inclusive Playground Design® as a guide to creating meaningful play experiences that engage every child, recognizing them for evidence-based design and qualifying them for data outcomes reports. Playgrounds built on these principles qualify for National Demonstration Site status, recognizing them for exemplary design and implementation practices.

New Options for
Inclusive Play

Ramp Up the Fun!

Since introducing the first commercially available ramped play system in 1987, we've been dedicated to creating even more inclusive environments. Our ramped systems feature extra-wide decks, allowing children using mobility devices to comfortably navigate the unit and play alongside their friends.

3

1 Modular Towers

Towers are the centerpiece of any playground and leave a lasting impression on young adventurers bold enough to climb them. We offer a wide selection of roofs, panels, climbers, and slides, allowing you to create a tower that's unique to your playful space.

2 Accessible Towers

The Adventus Tower is the industry's first accessible playground tower. Our new transfer platform makes it easier for children to transfer from a mobility device, while our SureGrip climbers provide extra support as children make their way to the top.

3 Space-Saving Towers

Create a multi-level climbing adventure with our Spire Towers! Designed to fit smaller areas, Spire Towers bring more play value to your available space by building up.

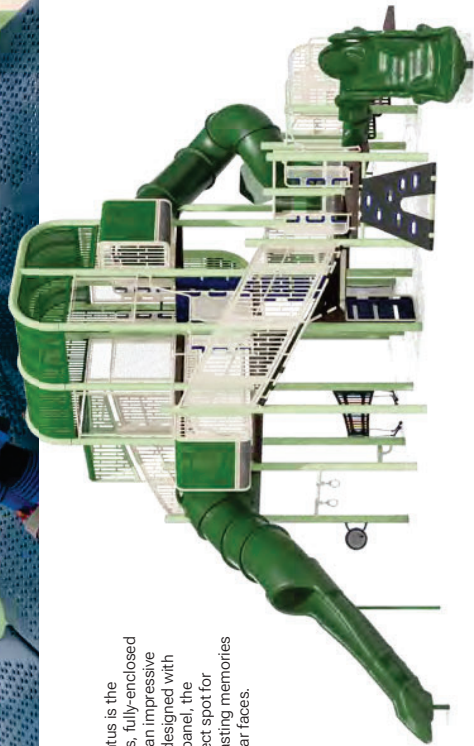

Adventure for All of us
Aventus

Lookout

At the heart of Aventus is the Lookout, a spacious, fully-enclosed gathering hub with an impressive view! Thoughtfully designed with sight lines in every panel, the Lookout is the perfect spot for children to create lasting memories with new and familiar faces.

Modular Designs
Altus

Kokoda Climber

The Kokoda Climber offers a fun and engaging way to connect two decks in your play system. Two angled climbers are installed at ground level to provide a challenging path to the climber's upper deck. In between the two ladders, a comfortable hammock offers a relaxing spot for users to rest and socialize before returning to play. That's three activities in one climber!

⚠ WARNING: installation over a hard surface such as concrete, asphalt, or packed earth may result in serious injury from falls.

Sensory Wave

The Sensory Wave Climber® is the industry's first inclusive playground climber that promotes active play while engaging the senses. With integrated grips and a transfer area for added support, this climber encourages children of all abilities to explore different sensory activities at their own pace.
