PlayCast Critters

These fun, playful critters are crafted from durable PlayCast resin and hand-painted for realistic detail. Easily attach these new companions to any play system upright - or pair them with the Find the Critters panel for a fun game of "I Spy" on the playground.

⚠ WARNING: Installation over a hard surface such as concrete, asphalt, or packed earth may result in serious injury from falls.

Playful Landscapes™

When children climb hills, mounds, and other natural features, they develop essential physical, cognitive, and motor skills, as well as improved spatial awareness. Playful Landscapes uses our patent-pending LockTech™ framework to remove all the guesswork from creating hills in playground surfacing, ensuring precise installation every time.

Award-Winning Inclusive Design

The Sensory Wave System® is internationally-recognized as a revolutionary and inclusive play experience. Boasting molded-in hand and foot holds, a transfer-height platform, interactive play activities, and much more; it is a one-of-a-kind fusion of climbing and sensory play designed for everyone to enjoy!

Sensory Wave transfer makes it easy for children to transfer to and from a mobility device.

WARNING: Installation over a hard surface such as concrete, asphalt, or packed earth may result in serious injury from falls.
